Sterno Safety Acknowledgment and Waiver

KCSOS – AYS Catering Event date _____

Customer or organization _____

Event and venue _____

Risks and safe use

Sterno chafing fuel uses an open flame that can be difficult to see. Hot cans and spilled fuel can cause serious burns, fire, injury, and property damage. Keep children, guests, linens, decorations, and loose clothing away. Assign a responsible adult to supervise lit fuel. Keep cans upright in stable holders and never move a lit or hot can or a chafing dish with a lit can beneath it. Follow the product label and venue rules.

How to extinguish the Sterno can

Leave the can in its holder. Use a long-handled snuffer paddle or the manufacturer-approved cap or snuffer to cover the opening fully. Never blow out the flame, use your hand, or pour water into the can. Check that the flame is out without leaning over the can. Let the can cool completely before handling or moving it.

What to do if fuel spills

Burning or possibly burning fuel. Warn others, move everyone away, and call 911 from a safe location. Treat a spill near a lit can as potentially burning, even if you cannot see flames. Do not touch or move the can, wipe up the spill, or pour water on it.

Keep people away and alert the caterer or venue staff. Keep flames and other ignition sources away. Leave cleanup to trained staff, who should follow the product's Safety Data Sheet for protective equipment, absorbent material, and disposal.

Customer acknowledgment and limited waiver

I have read these instructions and had an opportunity to ask questions. If I take control of the fuel, I agree to supervise its use and share these instructions with anyone I designate to handle it. I accept the risks arising from my handling or use of the fuel. To the extent permitted by law, I release the caterer from my own claims to the extent they result from my failure to follow these instructions. I retain all rights that the law prohibits me from waiving.
