STAR Data Dive

1. Take a look at the **Summary Report** to get an overview of your student scores.

    a. Look at scale score. Look at ranking. Identify lowest ranked students in each class.

    b. What does the data show you? What do you think it means?

    c. Do any of your students need additional support?

2. Take a look at your **Record Book**

    a. How are your student's grouped?

    b. Start thinking about groups. Are there any trends in your students' data?

    c. How many instructional groups do you think you will need?

    d. How many instructional groups do you think you can realistically manage?

    e. What are the numbers in each group?

3. Click on **Instructional Planning- Class Report**

    a. What skills can you support in the classroom for each group?

b. Which skill does your urgent intervention group need to work on first?

4. **Reading Dashboard**

   a. **Monitor Student Mastery Report**

      i. What standards are you covering this unit that might need extra support? Or less time focused on?

      ii. Click on View Skills and Resources

         1. Are there any resources you can use to teach/practice skills?

5. How will I use this data to drive my instruction this semester?

6. What will I do to differentiate for my various learner groups?
